

## **Allied Environmental Solutions, Inc. awarded two Circulating Fluid Bed (CFB) Scrubbers for Cleco's Rodemacher Power Station in Louisiana**

Allied Environmental Solutions, Inc., formerly Lurgi Lentjes North America, Inc., has been awarded a contract in excess of \$20 Million by a U.S. subsidiary within Foster Wheeler Ltd.'s Global Power Group for the engineering and supply of two Circulating Fluid Bed (CFB) Scrubbers.

The contract calls for Allied Environmental Solutions, Inc. to provide the Foster Wheeler subsidiary with a CFB Scrubber system for both of the 330 megawatt (MW) CFB boilers being built at Cleco Power, LLC's Rodemacher Power Station in Lena, LA. The two boilers are designed to use multiple fuels and will provide steam to a single 660 MW reheat turbine.

The state-of-the-art boilers in conjunction with the selective non-catalytic reduction systems, and Allied Environmental Solutions Inc.'s air quality control systems, will burn solid fuel cleanly while meeting stringent emissions requirements. Construction has begun on the project and commercial operation is scheduled for late 2009.
